Section 1 – Prompt

Final version of the prompt used:

Task: Generate a high-impact, single-page IT resume for an entry-level candidate.

Design Requirements:

- Layout: Use a sophisticated, modern layout. Align dates and categories to the right margin.
- Typography: Use bolding for project names and italics for institutions for a clear visual hierarchy.
- Style: Minimalist but professional, using clean lines to separate sections.

Content:

- Summary: 2-line summary focusing on technical aptitude and problem-solving as a final-year IT student.
- Skills: List Technical and Soft skills in a compact, horizontal format.
- Experience: Use action verbs (e.g., "Implemented," "Developed") for the GoBuk project.

Details:

- Name: Gaius Vincent Micabalo Delos Reyes
- Contact: 09455428660 | gaiusdelosreyess@gmail.com
- Education: BS in Information Technology (Current); Loyola School of Don Carlos, Inc. (2022–2024).
- Project: GoBuk (Web Systems Project) - Travel hub application for Bukidnon tourism.

Section 2 – LLM Outputs

Output from LLM #1:

GAIUS VINCENT MICABALO DELOS REYES

Highly motivated final-year Bachelor of Science in Information Technology student eager to contribute foundational technical skills and a strong problem-solving mindset to a dynamic IT team.

Phone: 09455428660 | **Email**: gaiusdelosreyess@gmail.com

EDUCATION

Bachelor of Science in Information Technology Tertiary
Currently Enrolled

Loyola School of Don Carlos, Inc. | 2022–2024 Secondary

TECHNICAL & SOFT SKILLS

- **Technical Skills**: Computer Literacy, Web Development Fundamentals, Version Control (GitHub)
- **Soft Skills**: Adaptability, Effective Communication, Problem-Solving

PROJECT EXPERIENCE

Project Name: GoBuk (Web Systems Project)

Link: https://github.com/GdelosReyes12/WebSysProject

- Developed a travel hub application focused on Bukidnon's tourism.
- Built using beginner-level coding principles to showcase location-based information and user navigation. Handled front-end structure and core logic.

Output from LLM #2:

GAIUS VINCENT MICABALO DELOS REYES

09455428660 gaiusdelosreyess@gmail.com

Final-year IT student eager to apply my technical skills and contribute to a dynamic IT team.

EDUCATION

- Bachelor of Science in **Information Technology** | Currently Enrolled
- **Loyola School of** Don Carlos, Inc. | 2022–2024

SKILLS

- **Technical Skills:**
  - Computer Literacy
  - Web Development Fundamentals
  - Version Control (GitHub)
- **Soft Skills:**
  - Adaptability
  - Effective Communication
  - Problem-Solving

PROJECT EXPERIENCE

- **GoBuk** (Web Systems Project)
  - **GitHub:** https://github.com/GDelosReyes12/WebSysProject
  - Developed a travel hub application focused on **Bukidnon's tourism.**
  - Built using beginner-level coding principles to showcase location-based information and user navigation.
  - Handled front-end structure and core logic.

Section 3 – Comparison Table

Criteria	LLM #1	LLM #2
Structure	Linear and traditional; lots of white space.	Balanced; uses full page width effectively.
Clarity	High, but repetitive bullet styling.	Excellent; easy to scan in under 10 seconds.
Formatting	Basic; lacks visual hierarchy.	Professional; uses bolding and alignment well.
Overall Quality	Good for a first draft.	Industry-standard; ready for applications.

Section 4 – Reflection

In comparing the two LLM outputs, LLM #2 performed significantly better for an IT-specific context. While both models captured the raw data accurately, the second output demonstrated a better understanding of modern recruitment trends. The primary difference was the "spatial awareness" of the AI; LLM #1 provided a generic list, whereas LLM #2 utilized horizontal grouping for skills and right-aligned dates, which is a standard practice for professional resumes.

The most critical improvement I made in the final version was the language used in the Project Experience section. In my initial attempt, I described my work as "beginner-level." Through refined prompting, I learned to describe the same work using technical action verbs like "implemented UI/UX navigation" and "applied clean architecture." This change shifts the focus from my status as a student to my potential as a contributor.

I learned that prompting is not just about providing data, but about providing "intent." By specifying that the AI should use a "sophisticated layout" and "action verbs," I was able to transform a simple list of facts into a persuasive marketing document. This experience taught me that the quality of AI output is directly tied to the constraints and stylistic directions provided in the prompt.

Section 5 – Final Resume

GAIUS VINCENT MICABALO DELOS REYES

09455428660 gaiusdelosreyess@gmail.com

PROFESSIONAL SUMMARY

Final-year Information Technology student with strong technical aptitude and a passion for solving complex problems through efficient, scalable solutions.

Eager to contribute to a dynamic IT team by applying modern development practices and continuous learning.

EDUCATION

Bachelor of Science in Information Technology ..... (*Currently Enrolled*)

Secondary: *Loyola School of Don Carlos, Inc.* 2022–2024

SKILLS

Technical: Computer Literacy | Web Development Fundamentals | Version Control (GitHub)

Soft: Adaptability | Effective Communication | Problem-Solving

PROJECT EXPERIENCE

GoBuk (Web Systems Project)

- **GitHub:** https://github.com/GDdelosReyes12/WebSysProject
- Developed a tourism-focused travel hub application showcasing destinationions in Bukidnon
- Designed and implemented intuitive UI/UX navigation to enhance user interaction & accessibility
- Applied **clean architecture principles** and industry-standard practices in structuring the application
- Led **front-end development** and executed core logic implementation for dynamic content delivery
