- Initial Prompt:

Task: Create a professional, responsive one-page personal portfolio resume website using HTML and modern CSS (Tailwind CSS preferred).

Design Requirements:

- **Layout:** Clean, minimalist, and mobile-friendly. Use a single-column layout for mobile and a structured two-column or modern-aligned layout for desktop.
- **Color Palette:** Professional (e.g., Slate, Navy, or Charcoal with high-contrast text).
- **Sections:** Include a Header, Professional Summary, Education, Skills (using tags/badges), and Project Experience.

Content Details:

- **Name:** Gaius Vincent Micabalo Delos Reyes
- **Contact:** 09455428660 | gaiusdelosreyess@gmail.com
- **Summary:** Final-year IT student focused on technical aptitude and scalable problem-solving.
- **Education:** BS in Information Technology (Current) and Loyola School of Don Carlos, Inc. (2022–2024).
- **Technical Skills:** Computer Literacy, Web Development Fundamentals, Version Control (GitHub).
- **Project:** GoBuk (Web Systems Project) - A Bukidnon tourism travel hub. Use bullet points to describe UI/UX navigation and clean architecture.

Output: Please provide the `index.html` and a `style.css` file (or a single file with CDN links) that I can run immediately in this Repl.

- Refinement Prompts (at least 2 more)

#Refinement Prompt - 1

Task: Refactor my resume website into a clean, high-end academic and technical portfolio using HTML and Tailwind CSS.

Core Aesthetic:

- Style: Minimalist "Bento Grid" or "Clean Card" layout. Use a professional white and soft gray background with Ateneo Blue (#003366) as the primary accent color.
- Typography: Use a sophisticated, readable font stack like 'Inter' or 'Geist'.
- Vibe: Academic excellence meets modern IT professional.

Component Specifics:

- Hero Section: Clear heading for "Gaius Vincent Micabalo Delos Reyes." Explicitly state role as: "Second-year Information Technology Student at Ateneo de Davao University."
- Education Section: Prioritize the university details. Use a clean card that highlights your current academic journey at AdDU, including "Relevant Coursework" (e.g., Web Systems, Programming).
- Technical Skills: Remove progress bars. Replace them with a sleek "Technical Toolkit" section using minimalist badges or icons for Computer Literacy, Web Development Fundamentals, and Version Control.

- Project Showcase: Create a featured card for "GoBuk." Include a placeholder for a project image, a GitHub link button, and small tags for the technologies used.

Data Updates:

- Name: Gaius Vincent Micabalo Delos Reyes
- School: Ateneo de Davao University (2nd Year BSIT)
- Project: GoBuk - Focus on its role as a "Web Systems Project" featuring clean architecture.
- Contact: gaiusdelosreyess@gmail.com | 09455428660

#Refinement Prompt - 2

Refine the 'Technical Skills' and 'Project' sections of my website for better clarity:

1. Skills Organization: Instead of a long list, group skills into categories: 'Development' (Web Fundamentals, GitHub) and 'Core IT' (Computer Literacy, Systems Logic). Use clean, outlined pill badges for each.
2. Project Narrative: For the 'GoBuk' project, add a small 'Key Achievement' sub-section that mentions 'Implementing location-based navigation' and 'Building a responsive front-end.'
3. Contact Footer: Create a clean, centered footer with my contact details and clickable social icons (GitHub/LinkedIn). Use a 'Back to Top' button that appears as the user scrolls down."

- Final Reflection

- **What worked well?**
  My prompt worked well, including information that I already set so the AI then can just make the designs and such. It also gave a clear idea on what I wanted it to build.

- **What needed manual fixing?**
  Not really a fix but I manually added an image since I dont think AI can build my logo in a way on what I really wanted it to look like

- **What did you learn about prompting?**
  For me personally, in prompting what you want to do is make a clear idea on what the AI will build, I learned also in doing it in a structure called “RICE”.
